Prepared for the board and member-owners of Serenity Club of Clearwater

August 1-31, 2026

Prepared September 9, 2026

The club's Facebook Page: Serenity Club of Clearwater

7,580

Content views

Times the club's content was displayed or played. Repeat views count.

1,514

Viewer accounts

Facebook's estimated number of accounts that saw the club's content.

868

Engagement actions

Reactions, clicks, comments, shares, and saves recorded on posts.

What August tells us

Visibility fell, while visits to the Page increased. Content views were 48.6% lower than July and engagement was 51.4% lower. The Page itself received 533 visits, up 7.7%. These measures describe different kinds of activity.

The club continued to reach beyond its followers. About 31% of views came from accounts that did not follow the Page. Facebook attributed all 7,580 views to unpaid distribution, with 0 views from ads.

The following grew modestly. Fourteen follows and five unfollows produced a net gain of nine. These are Facebook follows, not new club memberships.

Photos and club events were prominent. Single-photo and multiple-photo content generated 79.5% of all views. The featured-post list includes a bake sale, birthday celebrations, breakfast, movie night, and bowling.

Practical priorities for the next month

Keep helpful event information visible. Include the date, time, location, and a clear next step in announcements and reminders.

Review the decline alongside the posting calendar. The published-content summary lists 33 items, down 23.3% from July. That may be relevant, but the figures do not establish why views fell.

Monthly results & daily pattern

August compared with July 2026 | Both are complete 31-day months

Measures with exact counts for both months

Measure	July	August	Change
Content views	14,754	7,580	48.6% fewer
Reactions, comments & shares	861	433	49.7% fewer
Facebook Page visits	495	533	7.7% more
Link clicks	1	2	100.0% more
New follows	18	14	22.2% fewer

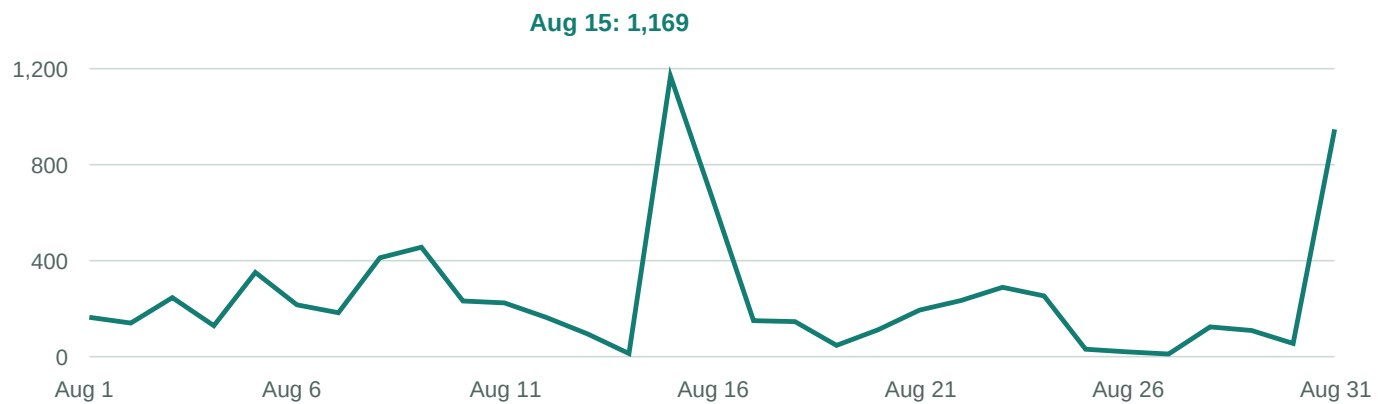

Link clicks rose from 1 to 2: a 100% increase, but only one additional click. Link clicks should not be treated as a count of visits to the club's website.

Additional August measures

Measure	August	Change from July
Viewer accounts (estimated)	1,514	56.5% fewer
All engagement actions	868	51.4% fewer
Net gain in followers	9	31% fewer*
Messaging conversations started	2	33.3% fewer

* Facebook rounds this change to a whole percent. Other changes above use the displayed precision. Earlier counts have not been estimated from percentage changes.

Daily content views

August 15 was the busiest day for views. The complete daily figures are on page 6.

Content & engagement

What was published, what was viewed, and how people responded

Published-content summary: 33 items

26 photo items | 3 text items | 3 stories | 1 reel

The summary lists 23.3% fewer published items than July and is based on up to 200 items. Views below can also come from older content. A reel is Facebook’s video format; a story is a temporary post.

August activity by content format

Format	Views	Share of views	Interactions
Single photo	4,547	60.0%	286
Multiple photos	1,477	19.5%	43
Text	730	9.6%	29
Links	649	8.6%	66
Reels	117	1.5%	1
Stories	Not separate	-	3
Other	60	0.8%	5
TOTAL	7,580	100%	433

This table uses Facebook’s business reporting view consistently. Story views are not shown separately; the displayed view categories add to 7,580. The two photo categories account for 6,024 views (79.5%).

Why there are two interaction totals

333 reactions + 73 comments + 27 shares = 433 interactions.

Reactions include Like, Love, and the other reaction buttons. The broader dashboard total is 868 engagement actions, which also includes clicks and saves. The remaining 435 actions are not broken out individually in this report.

Of the 433 reactions, comments, and shares, reactions made up 76.9%, comments 16.9%, and shares 6.2%. Facebook’s engagement audience chart showed 86.4% from followers and 13.6% from non-followers.

Video viewing

39 views lasting at least 3 seconds (up 5.4% from July), 0 one-minute views, and 7 minutes 7 seconds of total watch time (down 25.8%). Watch time adds viewing time across plays; it is not the length of one video.

Featured August posts

Leading content shown by Facebook | Post snapshots captured September 9, 2026

These are post-level snapshots, not August-only contributions. Facebook listed these posts with August selected, but the individual post pages do not limit their counts to August. Later views and responses may be included. Do not add these figures to the monthly totals.

What the board can take from these examples

Fundraising, invitations, reminders, and celebrations appear in the leading-content list. Continue using clear photos and practical event details. These examples show online interest; they do not establish attendance, fundraising income, or which posts created new memberships.

The Page's audience

Current follower profile | These are lifetime estimates, not August-only visitors

1,411 followers

61.3% women | 38.7% men

Facebook's audience view covers August 9, 2023 through September 8, 2026, and was captured September 9. Follower accounts are different from club members or meeting attendees.

Age and gender

Age range	Women	Men	All followers
18-24	0.1%	0.1%	0.2%
25-34	3.6%	2.1%	5.7%
35-44	13.9%	8.3%	22.2%
45-54	14.9%	7.4%	22.3%
55-64	16.1%	10.9%	27%
65 and older	12.7%	9.9%	22.6%

Each percentage is a share of the follower audience, not a share within that gender. About half of followers were age 55 or older (49.6%). These are Facebook's estimates.

Top cities

City	Share
Clearwater, FL	19.8%
Largo, FL	7.4%

Clearwater was the largest listed city at 19.8%; the United States accounted for 97.4%. Only the top locations are shown, so these lists do not add to 100%.

Audience figures on this page come from Meta Business Suite. Its location percentages differ from the Professional dashboard, so the two sets have not been combined.

Daily activity in August

MONTH	7,580	1,514*	433	533	2	14

* Monthly viewer accounts are counted across the whole month. Daily viewer counts add to 3,117 because an account can appear on several days; use 1,514 for August's estimated audience.

The other five daily columns add to their monthly totals. Five unfollows during August reduced 14 follows to a net gain of 9. A zero means no recorded activity for that measure.

Messages, definitions & sources

How to read this report and what the figures can tell the club

August messaging activity

Measure	August result
Conversations started	2
Messaging contacts	2
New contacts / returning contacts	2 / 0
New contacts from unpaid activity / ads	100% / 0%
Orders created / leads recorded	0 / 0
Response rate / response time	Not available

A conversation starts with a first message or a message after at least seven inactive days. Facebook marks this measure as still in development. Two conversations were recorded, down 33.3% from July. Missing response figures do not mean messages went unanswered.

Orders and leads refer to Facebook's business tracking features. Zeros here do not establish that the club had no sales, inquiries, new members, or donations.

Keep the measures separate

Views and viewers. Views count displays or plays, including repeats. Viewers are estimated Meta accounts that saw content at least once; they are not a verified count of different people.

Visits, clicks, and follows. Page visits occur on Facebook. Link clicks are clicks on links, with no destination breakdown here. Follows mean choosing to receive Page updates. None of these measures confirms a visit to the clubhouse.

Timing and scope. Monthly totals cover August 1-31. Daily dates follow Facebook's Pacific Time setting. Featured posts can include later activity; audience demographics are lifetime estimates. Views from ads were zero in August; that figure is not an advertising spending statement.

Using the separate reports. Facebook, Google, and website audiences can overlap. Do not add them as different people. This Facebook report uses the same month as the Google report; the website report uses a different 30-day period.
